

At Specs, we carefully check and properly package your orders. We apply a small order fee to be able to cover the associated costs for orders below a certain threshold.

#### Minimum order threshold

Specs maintains a minimum order policy of €150,- or \$200,- per order. All orders with a value below this amount will be charged a variable 'small order fee' to bring the total sum up to this minimum threshold.

#### Shipping and administration costs

All orders exceeding a value of €350,- or \$450 are exempted from administration costs. For orders below this threshold the following administration costs will be applied:

	€	\$
Admin costs regular order	75	100
Admin costs Specs.net order	0	0

Shipment costs will be applied based on the order size, format and/or destination.

Orders placed through [www.specs.net](http://www.specs.net) are devoid of administration costs. When using your own company courier account, no shipping costs will be applied.

#### On-line ordering

Specs was the first compound supplier to launch an online chemical search engine, Specs.net, enabling structure-based searches and ordering of chemical compounds together with viewable and downloadable analytical data. Our compound availability is updated daily providing for accurate and up-to-date search results. We encourage you to register today and try it out.
